

FULL STACK SOFTWARE DEVELOPER

MAINA ZAQUIR

Nairobi, Kenya

+254 798 357 848 | mzaquir58@gmail.com | <https://www.linkedin.com/in/zaquir-maina-200b73246/> | <https://github.com/MainaZaquir> | <https://mainazaquir.vercel.app/>

PROFESSIONAL SUMMARY

Full Stack Software Developer focused on designing and delivering structured, end-to-end web systems with reliable backend architecture and data-driven functionality.

Experienced in building and deploying applications that integrate authentication, scalable APIs, and optimized data workflows, with a strong emphasis on system completeness, maintainability, and real-world usability.

Approaches development with a backend-first mindset, prioritizing stable architectures, clean data flow, and proactive handling of edge cases and failure scenarios. Combines software engineering and data systems experience to deliver solutions that are both functional and performance-driven, while collaborating effectively across technical and business teams

ACADEMIC QUALIFICATIONS

Certificate in Software Engineering Moringa School, Nairobi | Sept 2023 – Mar 2024

- Specialized in full-stack development using JavaScript (React, Node.js), MongoDB, and Python
- Built and deployed application-based projects applying Agile development principles

Certificate in DevOps Engineering Moringa School, Nairobi | Mar 2023 – Jun 2023

- Gained hands-on experience with CI/CD pipelines, containerization (Docker), and cloud-based deployment
- Worked with automation tools including GitHub Actions and Jenkins

Certificate in Software Engineering (Foundations) MODCOM Institute, Nairobi | Apr 2022 – Aug 2022

- Covered core programming concepts, database systems, and software development lifecycle
- Developed practical projects focused on problem-solving and collaborative development

Thika High School, Thika | KCSE Certificate Jan 2018 - Apr 2022

TECHNICAL SKILLS

Languages: JavaScript (Node.js), Java, PHP, SQL

Backend Systems: RESTful APIs, Authentication (JWT, OAuth), API design, server-side architecture

Frontend: Modern JavaScript frameworks, responsive UI systems

Databases: MySQL, PostgreSQL

DevOps: Deployment, Git version control, CI/CD fundamentals

CORE COMPETENCIES

- **Structured Problem Solving:** Breaking down complex requirements into clear, executable technical solutions
- **Ownership & Accountability:** Delivering end-to-end solutions independently, from concept through deployment
- **Cross-Functional Collaboration:** Working effectively with both technical and non-technical stakeholders to translate requirements into working systems
- **Analytical Thinking:** Applying data-driven approaches to improve system performance and decision-making
- **Attention to Detail:** Ensuring code quality, validation, and reliability across system component

FULL STACK SOFTWARE DEVELOPER

MAINA ZAQUIR

Nairobi, Kenya

PROFESSIONAL EXPERIENCE

Full Stack Developer

Core Digital | Nairobi (Hybrid / Contract / Independent Delivery)

Feb 2025 – Present

Designed and delivered full-stack applications with integrated authentication, database systems, and API-driven architecture

- Built backend services supporting user management, data processing, and secure system interactions
- Owned the full development lifecycle from concept to deployment, ensuring functional and maintainable solutions
- Structured applications to support scalability, reliability, and clean separation of concerns

Key Impact:

- Consistently delivered complete, working systems without supervision, reinforcing execution discipline and ownership
- Strengthened backend implementation quality, moving beyond UI-focused builds to structured system design

SQL Data Analyst

Collection Africa Limited | Westland's, Nairobi

Apr 2023 – Jan 2025

- Redesigned and optimized data workflows, improving operational efficiency by **20%**
- Implemented validation systems that reduced data errors by **30%** and improved data reliability
- Built automated reporting solutions, reducing manual effort by **40%** and enabling faster decision-making
- Integrated secure data handling processes to support audit and compliance requirements
- Delivered insights that contributed to a **15% increase in client retention**

Key Impact:

- Reduced issue resolution time by **50%**, accelerating system improvements and operational responsiveness
- Documented system processes and trained teams, reducing onboarding time by **40%**

PROJECT EXPERIENCE

Kenya Real – Full Stack Real Estate Platform

Live Application

Designed and developed a full-stack real estate platform tailored to the Kenyan market, focused on improving transparency, usability, and trust in property discovery.

- Built backend APIs to manage property listings, user interactions, and agent verification workflows
- Designed data models to support dynamic filtering, search functionality, and structured property data

FULL STACK SOFTWARE DEVELOPER

MAINA ZAQUIR

Nairobi, Kenya

+254 798 357 848 | mzaquir58@gmail.com | <https://www.linkedin.com/in/zaquir-maina-200b73246/> | <https://github.com/MainaZaquir> | <https://mainazaquir.vercel.app/>

- Integrated mapping and visualization features including location insights and price-based analysis
- Structured the system to support scalability and future enhancements

Engineering Highlights:

- Designed API-driven architecture to support flexible frontend interactions
- Implemented data handling strategies for dynamic queries and filtered search results
- Built trust mechanisms through structured agent verification workflows

Volunteer Experience

- **President Debate Club:** Led the club in organizing debates, training members and representing the school in competitions.
- **Member of St. John Ambulance Club:** Participated in first-aid training and emergency response drills and provided support during school events.
